MOVING
TOWARDS
A SCIENCE
WITH AND FOR
SOCIETY

Responsible Research and Innovation (RRI): bridging the gap between science and society

Responsible Research and Innovation (RRI) aims to bring together researchers, citizens, policy makers, businesses and educators to cooperate during the entire research and innovation process in order to align the outcomes of research with the values and needs of society.

RRI is a cross-cutting issue in the European Commission 'Horizon 2020' Framework Programme. Its ultimate ambition is to address the great challenges of our time (climate change, energy, health, etc.) and to encourage smart, sustainable and inclusive growth in Europe. It is still an emerging concept and, in order to implement RRI, concrete tools are needed. This is where our project steps in.

RRI Tools: from analysis to a Community of Practice

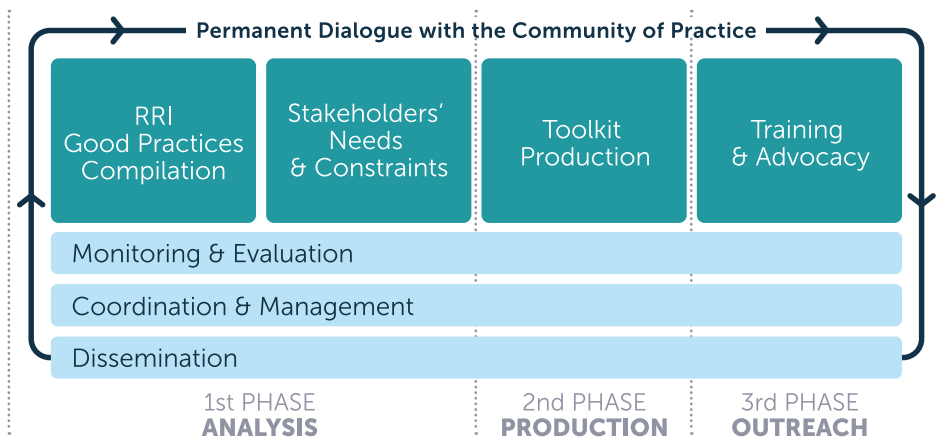

RRI Tools is a project funded for three years (2014-2016) by the European Commission under the **7th Framework Programme** (FP7). A 26 members' Consortium has been set up, extending across **30 countries** in the European Research Area.

This project aims to develop a **Toolkit** to help in the implementation of **Responsible Research and Innovation in Europe**. Collaborating with all stakeholders, it will help create a **Community of Practice** in Europe, which will ensure the use, evolution and enrichment of the Toolkit.

In order to build this Community of Practice, the Consortium relies on 19 national centres, the **RRI Hubs**, responsible for opening participation to the maximum number of institutions and individuals in the field. The project is divided into three phases and is based on a **permanent dialogue** with all the stakeholders.

The Consortium (C) will reach a wide Community of Practice (CP) through the Hubs (H).

Want to join the RRI Tools Community?

BE PART OF THE PROJECT

Acting on governance and ethics in research and innovation?

Already taking part in citizen science actions?

Looking for tools and best practices to conduct RRI?

Promoting gender equality to unlock the full potential?

Paying attention to open access issues?

Interested in the ways science and society interact?

WHETHER YOU ARE INVOLVED IN

Research and innovation

Industry and business

Policy-making

Communication and the media

Science education

Civil society organisations

Or you are just curious about science and society

This project is yours! There are many ways to play your part.

- Join the RRI Hub in one of the 30 participating countries and get involved in their activities.
- Contact us directly by e-mail or social media.
- Visit our website to join us, engage and access all our resources.
- Join the conversation on Facebook, Twitter and LinkedIn.

The RRI Tools community is on: it's the right time to join in!

RRI Tools is carried out by a multidisciplinary Consortium of 26 institutions across Europe with extensive experience in diverse areas that are a part of RRI.
