Abstract

Summarize the research project by briefly describing: central hypothesis, objectives, specific aims, research design, methods and potential translational outcomes.

(maximum 5000 characters)

Does this represent a resubmission of an application reviewed in the last edition of the Call?

- yes
 no

If yes, please specify:

- Phase I: Formal reasons (missing or incomplete documents, budget coherence)
 Substantial reasons (on the basis of reviewers' evaluations)

- Phase II: Formal reasons (missing or incomplete documents, budget coherence)
 Substantial reasons (on the basis of reviewers' evaluations)

Final score: _____

Address here the reviewers' critiques (phase I or II) and explain how the proposal has been improved.

(maximum 3000 characters)

Relevance to the Call

Clearly specify how the goals of the project fit with the aims of the Call.

(maximum 3000 characters)

Bibliography

List all the articles cited in the project. For each publication indicate: name of the authors, title, journal, volume, issue, pages and year of publication. If the document is available online, provide the link.

(maximum 10 references)

If it is the case, indicate any changes you made responding to LOI review comments and/or any advancements which have occurred in your career from the Call deadline (publication, Grant)

(maximum 3000 characters)

Scientific background

Describe the background of the proposed project, critically evaluate the existing knowledge and identify the gap[s] the project intends to fill. Clarify in which ways the project represents a significant step forward with respect to the current state of the art.

(maximum 8000 characters)

Preliminary data and rationale of the project

List and comment on all preliminary data available and pertinent to the proposed research. Clearly state the project's hypotheses.

(maximum 7000 characters, legends included; figures, tables and pictures must be clearly legible both in print and on computer monitors)

Experimental plan

Describe: i) methods and actions planned (WPs and tasks), ii) expected outputs, iii) milestones and deliverables, and iv) role of the partners (if any). Provide a tentative timetable (Gantt). Discuss how data are going to be analysed and interpreted and provide a description of the statistical methods that you intend to adopt. In addition, consider potential pitfalls and caveats, discussing possible difficulties and limitations of the proposed procedures. Finally, suggest alternative approaches to achieve expected objectives.

(maximum 20000 characters, legends included; figures, tables and pictures must be clearly legible both in print and on computer monitors)

Project Originality and Innovation

Indicate if the project employs novel concepts, approaches or methods and if it challenges existing paradigms in the field or develops new methodologies or technologies.

(maximum 3000 characters)

Bibliography

List all the articles cited in the project. For each publication indicate: name of the authors, title, journal, volume, issue, pages and year of publication. If the document is available online, provide the link.

(maximum 50 references)
